

Name _____

Current average _____

Chapter 7- Solving Equations and Inequalities

- 7.1 Solving Two-Step Equations pg 348-450, examples 1, 2, 3
- 7.2 Solving Multi-Step Equations pg 352-355. examples 1, 2, 3
- 7.5 Solving Equations with Variables on Both Sides pg 367-369, examples 1, 2
- 7.6 Solving Two-Step Inequalities pg 373-375, examples 1, 2
- 7.7 Transforming Formulas pg 378-380, examples 1, 2
- 7.8 Simple and Compound Interest pg 382-385, examples 1

Chapter 8 – Linear Functions and Graphing

- 8.1 Relations and Functions pg 400-403, examples 1, 2.
- 8.2 Equations with Two Variables pg 405-408, examples 3, 4, 5.
- 8.3 Slope and Y- Intercept pg 411-414, examples 2, 3, 4

Study Tips-

Study old tests – corrections should have been made earlier in the nine weeks.
(correct answers will be given in class)

Rework homework problems and textbook examples.

Practice using the problems from the Chapter Review and Chapter Tests at the end of each chapter.
